how to use/create a view template in revit. This feature is not available right now. Please try again later.

Revit 2016 Template Guide Corenet

The document describes the features of the Architectural BIM Template for Revit 2016 and provides a step-by-step guide to apply them in projects. The template creates a basic structure to assist the QPs in preparing the BIM models for regulatory approval according to

Revit View Templates A How To Guide

Use project templates as a starting point for new projects. Use the default templates, or define custom templates to enforce office standards. A project template provides a starting point for a new project, including view templates, loaded families, defined settings (such as units, fill patterns, line styles, line weights, view scales, and more), and geometry, if desired.

By default the Template File location for Revit 2016 is C: > ProgramData > Autodesk > RVT 2016 > (Template File Name). For Windows Operating Systems the ProgramData Folder must be Unhidden to path to directly.

Revit 2016 Family Template File location not found ...

Re: Revit 2016 Family Template File location not found.....just like in 2015!!! Before Autodesk acquired Revit and the Revit UI became more like Architectural Desktop when one updated to a new version of Revit one had to seperately download Template Files and put them in the correct Folder for Revit to find Templates and Content Files.
