What is the independent variable? Cures (Seaweed and Dr. Kelp) What is the dependent variable? Slime and odor What should Sponge Bob's conclusion be? Although Gary's symptoms have disappeared, it is not known which cure was the one that worked. He should redo the experiment and include a control group as well as two other

Bart Simpson Controls And Variables With Answers

It's important for a scientist to try to hold all variables constant except for the independent variable. If a control variable changes during an experiment, it may invalidate the correlation between the dependent and independent variable. When possible, control variables should be identified, measured, and recorded.

Identify the Controls and Variables - The Biology Corner

Controlled variables are quantities that a scientist wants to remain constant, and she or he must observe them as carefully as the dependent variables. For example, in the dog experiment example, you would need to control how hungry the dogs are at the start of the experiment, the type of food you are feeding them, and whether the food was a type that they liked.

one factor and observes or measures what happens. * The Control Variable
The experimenter makes a special effort to keep other factors constant so that they will not effect the outcome. Those factors are called control variables.
