causing this problem. How can we find out at inspection? Thanks

Alaska Radio Reader Rambler: Wind Blown and Dripping ...

And on occasion a hard driving rain with whipping wind will cause roof vents to leak water. If your roof vent leaks during heavy rain, the rain may be blowing up under the hood and into the vent. If this is the case, you need to create a breathable shield to slow the driving rain drops while still allowing air flow.

Wind Blowing Sound Effect

The sound of water inside your walls can come from two major sources: a roof leak or water that comes through the walls themselves. Masonry walls are susceptible to this problem if the mortar between bricks or stones develops small cracks that wind-blown rain can press through.

Siding Leak Troubleshooting Diagnose, repair or prevent ...

The third roofer said that the flashing and shingles are fine. The issue is the roof has ridge vents and roof is not steep enough. The wind can blow rain into my roof's ridge vents. He thinks I should get rid of the ridge vents and replace it with box vents, and it would fix the issue. This solution also costs less too.
